***ALUMINUM & COPPER
ALLOY BUFFING &
POLISHING KIT***

1. For best results, thoroughly clean part to remove all grease and dirt
2. File or Emery paper all deep marks and scratches
3. Use the Sisal wheel (ropelike) and the black emery bar to buff the entire area. Use the cone bob and the black compound to get into difficult areas.
4. Apply small quantities of compound to the wheel frequently
5. Use the Spiral Sewn wheel and the brown compound to finally bring a high shine to the workpiece
6. Use the Loose Cotton wheel to get into difficult areas with the brown compound
7. Use the white liquid rouge and follow instructions on the label

Wheels should be fitted to a fast electric drill or air tool
